Dear,

Prof. Gabino Garrido

Editor in Chief of Journal of Pharmacy & Pharmacognosy Research

On this occasion, I am very interested in publishing our research results in the field of pharmacology, related to the chemical extract of Citrus aurantifolia referring to the antioxidant properties of fibroblast cells. This publication is one of the requirements of my PhD students for an examination of the dissertation (Indonesia). We hope to be able to publish to JPPRes through **Fast Review Mode**. Please inform me of the requirements that we must complete before we submit. Thank you for your help.

Best Regards

Dear author,
We are currently editing your article entitled: The Growth and Biofilm Formation of Enterococcus faecalis in Ethanol Extract of Citrus aurantifolia Indonesian Species (JPPRes-20-895). However, we have found serious errors in the editing and writing of English.

As the peer reviewers had already mentioned when accepting your manuscript, there were some errors that needed to be resolved during the editing process. However, we could not move forward if the authors did not correct the writing in English.

On the other hand, we must also remind you that in science writing must be objective and we must avoid subjective words such as "excellent", "good", "wonderful", "strong", among others.

We do all this with the best intention of improving the quality of your article and, in this way, also increase the visibility of what is published in JPPRes with high quality.

Please accept our humble suggestions that will benefit everyone.

In the attached file, you can find the edition of your manuscript (draft) with which we are working. Please make the necessary arrangements in this document and send us the corrections as quickly as possible.

Sincerely yours
